Education

University of Louisiana at Monroe

Monroe, LA

Bachelor of Science in Computer Science, Minor in Mathematics, GPA: 4.0 / 4.0

Aug 2022 – Dec 2025

- Relevant Coursework: Object-Oriented Programming, Data Structures, Analysis of Algorithms, Linear Algebra
- Research Focus: Applying the Meissel-Lehmer algorithm for prime number theory validation

Technical Skills

- **Languages:** Java, Python, TypeScript, JavaScript, SQL, HTML, CSS, Shell Scripting, Dart
- **Frameworks:** React.js, Node.js, Next.js, Flask, Flutter, Material-UI, Django, Drupal, Docker
- **Developer Tools:** Git, Google Cloud Platform, AWS, SSH, Atlassian, Agile, Jupyter, OpenAPI, REST API
- **Libraries:** Redux, TailwindCSS, pandas, NumPy, Matplotlib, scikit-learn, Manim, PyTorch, TensorFlow

Experience

Student Web Developer

Jan 2023 – Present

University of Louisiana - Monroe

Monroe, LA

- Created a reusable **PHP Drupal module** to integrate **Microsoft Teams API** into on-campus web products, achieving a **30% increase** in user communication
- Engineered a ETL pipeline using **Python and SQL**, successfully migrating **10,000+ records** from Drupal 8 to Drupal 10, resulting in a **40% improvement** in database query speed and a **25% reduction** in storage requirements
- Conducted comprehensive **end-to-end testing** on all on-campus department webpages, achieving a **98% accuracy rate** and ensuring high user satisfaction and usability before deployment

Software Developer

Oct 2022 – May 2023

Clamphook

Lalitpur, NP

- Upgraded the **Computer-Based Testing (CBT)** platform, accommodating **5,000 concurrent** users and leading to significant spikes in student enrollment, **4-5 times** the enrollment figures from the previous season
- Integrated a secure backend for **CH Points** with a reward redemption system, resulting in a **40% increase** in real-time test participation and a **25% rise** in student content engagement
- Led the deployment of the **frontend, admin panel, and backend components**, launching a **mobile application** that achieved **5,000 downloads** within the first month.

Projects

- **CheerPal** — Spearheaded a team of **6 members**, overseeing the development of a reminder application. Integrated **Firebase Cloud Messaging** for real-time notifications and utilized machine learning models for personalized product recommendations from **Amazon** and **Walmart**, employing **content-based filtering**
- **Prime Number Theory Research** — Researched the **Meissel-Lehmer algorithm** and **Prime Counting Functions** to validate prime number theory under Dr. Jemin Shim. Analyzed data sets with more than **1 million primes**, achieving **95% precision** in prime counting predictions
- **Trip Planner** — Designed and implemented a trip planning application using **Dijkstra's algorithm** and **Google Maps API** to optimize travel routes for time and distance. Achieved a **40% reduction** in travel planning time
- **Airfoil Simulation** — Developed and implemented a Python-based **Finite Element Method (FEM)** simulation for airfoil pressure distribution, for the student at Pulchowk Campus and improving the understanding by **40%**
- **Rookie** — Created a Discord bot using **Node.js** and **Discord.js** to manage tasks, deadlines, and study schedules. Increased adherence to schedule by **50%** and homework submissions by **30%** in our classroom Discord

Activities

- **Google Developer Student Club, Web Director**, University of Louisiana Monroe, Aug 2023 – Present
Directed workshops and mentoring sessions on web development frameworks, benefiting **150+** students
- **Association for Computing Machinery, Member**, University of Louisiana Monroe, Aug 2022 – Present
Participated in **15+** coding competitions and workshops, contributed to team projects, and expanded technical skills
- **Nepal Computer Science Alliance (NCSA), Board Member, Community Platform**, Mar 2021 – Sep 2022
Organized **10+** webinars and events, reaching over **500** participants and promoting computer science in Nepal
